PROFESSIONAL SUMMARY

Full stack developer with 8 years of experience, specialized in web and mobile frontend, building and shipping cross-platform applications with React Native. Strong background in frontend architecture, React, Next.js, and Node.js with TypeScript. Experienced in technical consulting, team leadership, and delivering scalable solutions across travel, consumer goods, edtech, and enterprise sectors. Comfortable working across the full stack, from UI components to REST API design, CI/CD pipelines, Docker, and AWS.

CORE SKILLS

Mobile Development: React Native, iOS, Android, Cross-Platform Development, App Store, Google Play

Frontend: React, Next.js, TypeScript, JavaScript, Redux, Redux Toolkit, React Query, TailwindCSS, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, RBAC

Databases: PostgreSQL, MongoDB, Redis

DevOps & Tools: Docker, AWS, Git, CI/CD, GitLab, GitHub, Jira, Postman, Vite, Webpack

Testing: Jest, React Testing Library, Unit Testing, Integration Testing, End-to-End Testing

Soft Skills: Technical Leadership, Architecture Design, Client Communication, Agile, Sprint Planning, Code Reviews

WORK EXPERIENCE

Frontend & Architecture Consultant | *Independent* | Jan 2024 - Present | Remote

- Defined scalable frontend architecture and engineering standards for product-oriented companies.
- Established structured estimation processes, SLA definitions, and release control frameworks.
- Designed secure authentication flows including JWT handling and refresh token rotation.
- Implemented robust REST integrations and aligned technical decisions with business and product strategy.
- Technologies: React, TypeScript, Redux Toolkit, REST APIs, JWT, RBAC, CI/CD, Node.js, TailwindCSS.

Mobile Developer | *DataArt Solutions, Inc.* | Jan 2023 - Present | Remote (New York, USA)

- Developed and maintained cross-platform mobile applications using React Native for clients across multiple industries.
- Worked in agile teams collaborating with backend developers, QA, and product managers to deliver features on schedule.
- Focused on performance optimization, code quality, and seamless user experiences on both iOS and Android.
- Stabilized key features, fixed critical bugs, and maintained deployment pipelines for App Store and Google Play.
- Technologies: React Native, TypeScript, JavaScript, Redux, React Query, Axios, React Testing Library, TailwindCSS.

Frontend Developer | *Gaia* | Jan 2021 - Dec 2021 | Remote (Spain)

- Built CRMs, ERPs and management systems for dental and legal practices.
- Developed a web and mobile application for port management in Spain.
- Focused on responsive design, clean component architecture and a consistent cross-device experience.
- Technologies: React, TypeScript, JavaScript, REST APIs.

Fullstack Team Lead | *SeekitUp* | Jul 2019 - Dec 2020 | Remote (Buenos Aires, Argentina)

- Led a small fullstack team building mobile and web products with React Native and React.
- Coordinated technical decisions, code reviews, and sprint planning while contributing hands-on to development.
- Designed REST APIs and built Node.js backend services to support mobile application features.
- Technologies: React Native, React, Node.js, TypeScript, JavaScript, iOS, Android.

Fullstack Developer | *eWaffle* | Jul 2018 - Jun 2019 | Remote (Chile)

- Designed and developed end-to-end solutions across frontend and backend for a Chilean edtech startup.
- Maintained and optimized existing applications through refactoring, performance improvements, and documentation.
- Explored and adopted new technologies to improve development workflows and user experience.
- Technologies: Next.js, React, Redux Toolkit, React Query, Node.js, Express.js, MongoDB, TypeScript, Nx.

KEY PROJECTS

Travel Booking Mobile Application - *USA travel services company*

- Built cross-platform mobile app with React Native deployed to App Store and Google Play.
- Integrated Google services and REST APIs using Axios and React Query for dynamic travel data.
- Wrote unit and integration tests with React Testing Library to ensure quality and reliability.

Enterprise CRM & Operations Platform

- Designed modular frontend architecture with Role-Based Access Control (RBAC) and JWT authentication.
- Built reusable UI component library and shared design system for multiple business units.
- Implemented feature flags for controlled rollout and managed environment separation (dev/staging/production).

Secure Client Mobile Application

- Implemented biometric authentication (Face ID / Fingerprint) and secure token storage.
- Integrated encrypted REST APIs and optimized background synchronization and lifecycle management.
- Managed store deployments and release cycles for iOS and Android.

Personal Portfolio - *three.js interactive site*

- Built a static site with a three.js 3D scene as a web component, no framework and under 700 KB of JavaScript.
- Open source at github.com/maximiliano-zeballos/portfolio, deployed with GitHub Pages.
